

Ornamental Fish from all over the world

Bryconops cf. caudomaculatus

Finally we could import this attractive tetra from Venezuela again. Currently 12 species of *Bryconops* are described from Venezuela, but most of them are known from preserved specimens only. So our determination is only tentative.

In any case the fish are very pretty; we suppose that they may reach a maximum length of about 6-7 cm, our fish are currently 4-5 cm long.

For our customers: the animals have code 212762 on our stocklist. Please note that we exclusively supply the wholesale trade. Available in limited numbers only!

Lexicon: *Bryconops*: means "similar to a *Brycon*"; *Brycon* is another genus of tetra. *caudomaculatus*: means "with a caudal spot".

Suggestion of a common name: Venezuelan fire stripe tetra

Baryancistrus xanthellus (L18) adult

The Yellow Seam Plecos or Golden Nuggets of the genus *Baryancistrus* (L18, L81, L177, see http://www.aquariumglaser.de/en/baryancistrus-118,-181,-181n,-1177_de_1072.html for an overview) belong to the most desirable species of pleco at all. Young fish look very beautiful. However, almost exclusively young specimens are available in the trade.

Thus we were very glad that we were able to manage the import of an adult pair. The fish have a total length of about 20-25 cm. The acclimatisation of the fish in our fishhouse made no problems at all. Maybe these two Golden Nuggets will become the ancestors of an upcoming aquarium strain?

For our customers: the animals have code 26480-L 018-7 on our stocklist. Please note that we exclusively supply the wholesale trade.

Lexicon: Baryancistrus: ancient Greek, means "heavy Ancistrus"; Ancistrus is another genus of catfish. xanthellus: ancient Greek, means "yellow".
