

# Ornamental Fish from all over the world

Xiphophorus hellerii Pastel Comet

The blue eye tells us that this wonderful new sport of the swordtail has been developed on white-bodied ancestors. This makes the red color on the body look so magically crystalline. The blue shine all over the body is fascinating. Finally, the dynamic "Comet" pattern on the tail puts the finishing touches on the fish.

For our customers: the animals have code 421113 on our stocklist. Please note that we exclusively supply the wholesale trade.

*Brienomyrus brachyistius*

This week we obtained from Nigeria a species of mormyrid which we haven't seen for years: *Brienomyrus brachyistius*. This comparably small species (maximum length reported is 17.5 cm, usually the fish becomes 10-12 cm long) is a close relative to the species *B. niger*, which we were also able to import again (see [http://www.aquariumglaser.de/en/brienomyrus-niger\\_de\\_1152.html](http://www.aquariumglaser.de/en/brienomyrus-niger_de_1152.html)).

The intelligent and playful fish are very lively. One looks after them not for their coloration, but for their funny looking behaviour.

# AQUARIUM GLASER GmbH

Ornamental Fish Import/ Export Wholesale Rare Fish Specialist

We have specimens which are more elongate and larger, these we think are males, and deeper bodied, smaller specimens, which we think are females. Nothing is known about the reproduction biology of the species. The fish feed happily on any type of usual fish food (living, frozen, dried) that fits the mouth.

For our customers: the fish have code 103502 on our stocklist. Please note that we exclusively supply the wholesale trade.
