

Ornamental Fish from all over the world

Pterolebias longipinnis

Finally we were able again to import this wonderful killifish from Paraguay. The fish are fast growing and reach a maximum length of about 12 cm. However, in the natural habitat it lives only a few months. Then the water dries away and only the eggs survive in the bottom of the former ditch until the next rainy season starts. Under aquarium conditions, however, the peaceful fish can live more than one year.

For our customers: the fish have code 342604 on our stocklist. Please note that we exclusively supply the wholesale trade
