

Ornamental Fish from all over the world

Pseudapocryptes elongatus

We could import this charming goby once more from India. It is a kind of mudskipper, but does never leave the water completely. It only swims in very shallow water. Against each other these mudskippers are absolutely peaceful. They feed readily on any type of usual fishfood. The maximum length is around 20 cm, but most specimens stay much smaller (around 12 cm).

For our customers: the animals have code 445553 on our stocklist. Please note that we exclusively supply the wholesale trade.
